SMART ENERGY PROJECT

WELCOME TO VOLTAIKO >>>

The First Remote Rental Platform for Renewable Systems

Voltaiko is an innovative start-up that allows its users, from anywhere in the world, to rent plants that generate renewable energy and benefit from an economic return from their production. **There is no other platform in the world based on the same principles.**

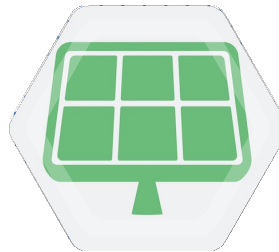

VOLTAIKO'S MISSION

Where did the idea of Voltaiko come from?

Spreading the culture of sustainable energy, leading the ecological transition and bringing people closer to a highly profitable market.

1. Technological

Use the internet to interconnect remote plants located thousands of kilometers away from its users.

2. Lucrative

Maximize economic yield through an innovative formula that eliminates bureaucracy and all the burdens of management.

THE ENERGY CRISIS >>>

Why Voltaiko is so important

The recent energy and geopolitical crisis has highlighted the importance of achieving independence from fossil fuels. Each of us has been directly affected by the quick and unexpected increases in bills, and many families have found themselves in serious difficulty coping with the uncontrolled increase in energy prices.

Protecting against the recent volatility in energy-related markets is a key goal

WHY CHOOSE VOLTAIKO

The sustainability of the future starts here

You don't have to install a physical plant

When you rent a system on our platform, you are buying the economic benefit of the energy produced - you will not have to install anything at home.

Start earning from day one

Every month, the platform credits you with Energy Points with a nominal value of € 1, which can be withdrawn via bank transfer or cryptocurrency

HOW IT WORKS

Within 90 days from the beginning of your Voltaiko rental, we will entrust the installation of the physical system to one of our international partners who will carry out the installation in one of the affiliated countries, with a private host or a company. For the duration of your rental (3 years) the production of your plant is fully awarded to you; at the end, the host of the plant becomes its owner without incurring any costs.

1900+

Installed Systems

International Partners

VOLTAIKO'S INNOVATION

A double benefit

1

For the Renter of the Remote System

Because they can benefit and earn from a photovoltaic or wind system without having to install it

2

For the Host of the Physical Plant

Because, simply by making their property available for the installation of the system, at the end of your rental they become the owner at zero cost

PLANT TYPES

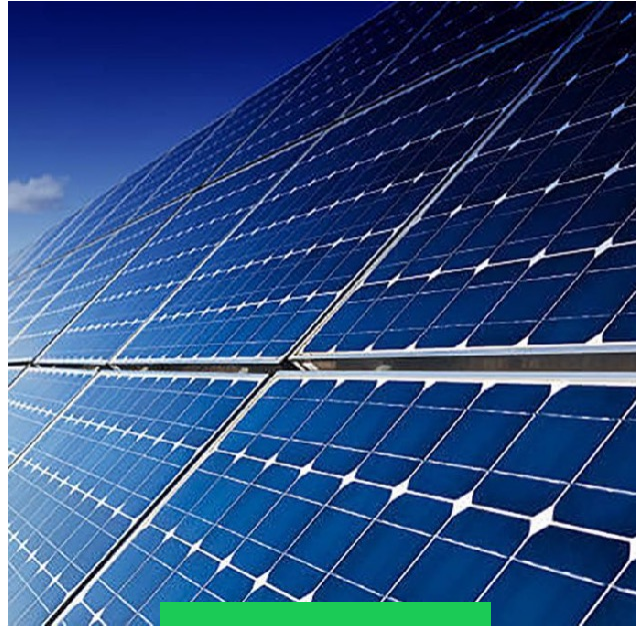

3 TYPES OF HIGH EFFICIENCY PLANTS

Hybrid

System composed of solar panels combined with wind turbines

RENTALS

Rental Configuration

Nine configurations available of varying power to embrace all the needs and demands of the market

SOLAR 3KW

Residential Solar Plant

1.000€

RENTAL PERIOD 36 MONTHS

Buy →

- ✓ Monthly Energy Points 55 - 60
- ✓ Full Return 1.980 - 2.160 €
- ✓ Semi-Annual Withdrawals

SOLAR 5KW

Residential Solar Plant

2.000€

RENTAL PERIOD 36 MONTHS

Buy →

- ✓ Monthly Energy Points 112 - 120
- ✓ Full Return 4.032 - 4.320 €
- ✓ Semi-Annual Withdrawals

WIND 5KW

Residential Wind Farm

3.000€

RENTAL PERIOD 36 MONTHS

Buy →

- ✓ Monthly Energy Points 168 - 178
- ✓ Full Return 6.048 - 6.408 €
- ✓ Semi-Annual Withdrawals

RENTALS

Rental Configuration

Nine configurations available of varying power to embrace all the needs and demands of the market

SOLAR 8KW

Residential Solar Plant

5.000€

RENTAL PERIOD 36 MONTHS

Buy →

- ✓ Monthly Energy Points 285 - 298
- ✓ Full Return 10.260 - 10.728 €
- ✓ Semi-Annual Withdrawals

SOLAR 10KW

Residential Solar Plant

7.500€

RENTAL PERIOD 36 MONTHS

Buy →

- ✓ Monthly Energy Points 415 - 435
- ✓ Full Return 14.940 - 15.660 €
- ✓ Semi-Annual Withdrawals

WIND 12KW

Residential Wind Farm

10.000€

RENTAL PERIOD 36 MONTHS

Buy →

- ✓ Monthly Energy Points 575 - 588
- ✓ Full Return 20.700 - 21.168 €
- ✓ Quarterly Withdrawals

RENTALS

Rental Configuration

Nine configurations available of varying power to embrace all the needs and demands of the market

WIND 25KW

Industrial Wind Plant

15.000€

RENTAL PERIOD 36 MONTHS

Buy →

- ✓ Monthly Energy Points 870 - 893
- ✓ Full Return 31.320 - 32.148 €
- ✓ Semi-Annual Withdrawals

MIXED 30KW

Mixed Industrial Plant

20.000€

RENTAL PERIOD 36 MONTHS

Buy →

- ✓ Monthly Energy Points 1.160 - 1.180
- ✓ Full Return 41.760 - 42.480 €
- ✓ Quarterly Withdrawals

MIXED 55KW

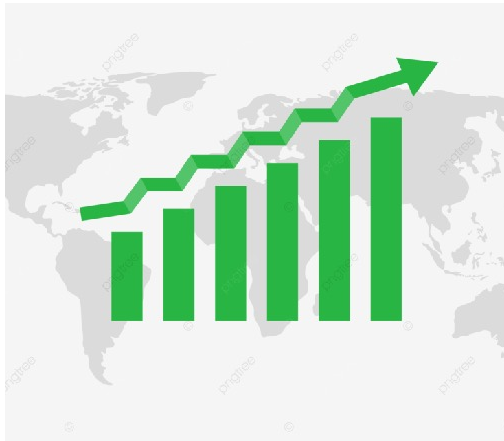

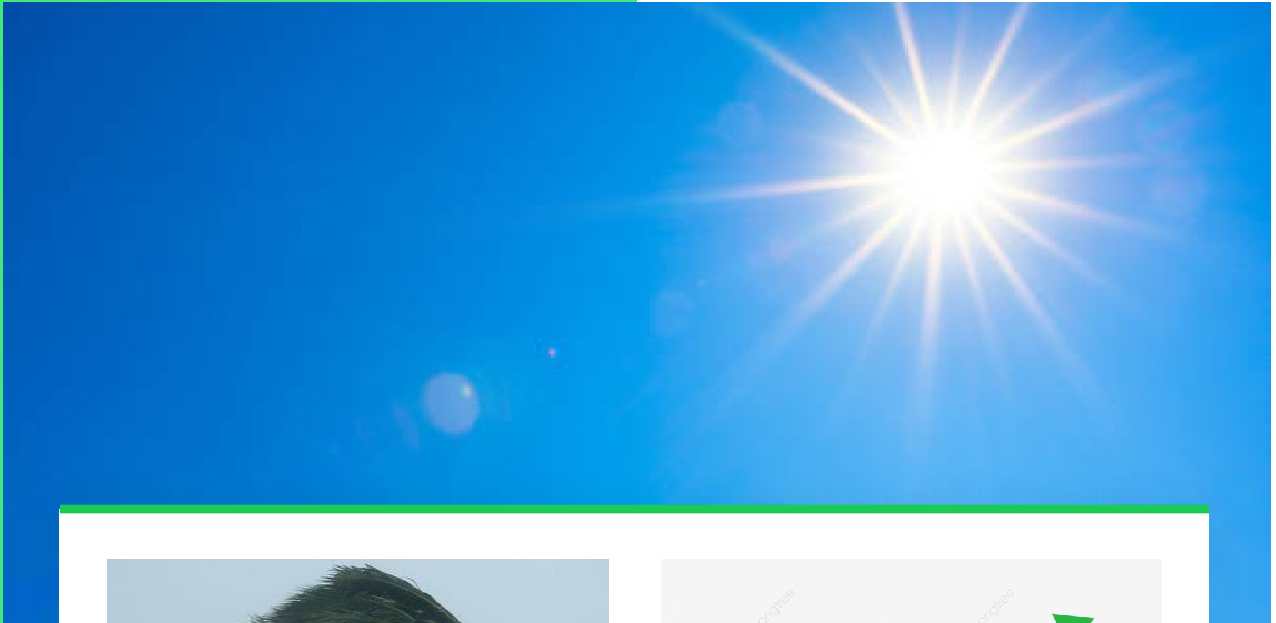

Mixed Industrial Plant

30.000€

RENTAL PERIOD 36 MONTHS

Buy →

- ✓ Monthly Energy Points 1.760 - 1.788
- ✓ Full Return 63.360 - 64.368 €
- ✓ Quarterly Withdrawals

WHERE WE INSTALL >>>

The importance of installing systems in strategic countries

Africa, Southeast Asia, the United Arab Emirates, South America, Indonesia - these are just some of the countries where our partners undertake system installations.

A winning strategic choice due to both natural and economic factors.

Sustainability

Our main sources of revenue are represented by the brokerage of energy on the markets, trade agreements with partners and suppliers, and post-rental contracts with the recipients of the plants. The average lifespan of a plant is about 25 years, and at the end of the rental period, the host of the physical infrastructure continues to use our services and our partners for more than two decades.

Energy Brokerage 30%

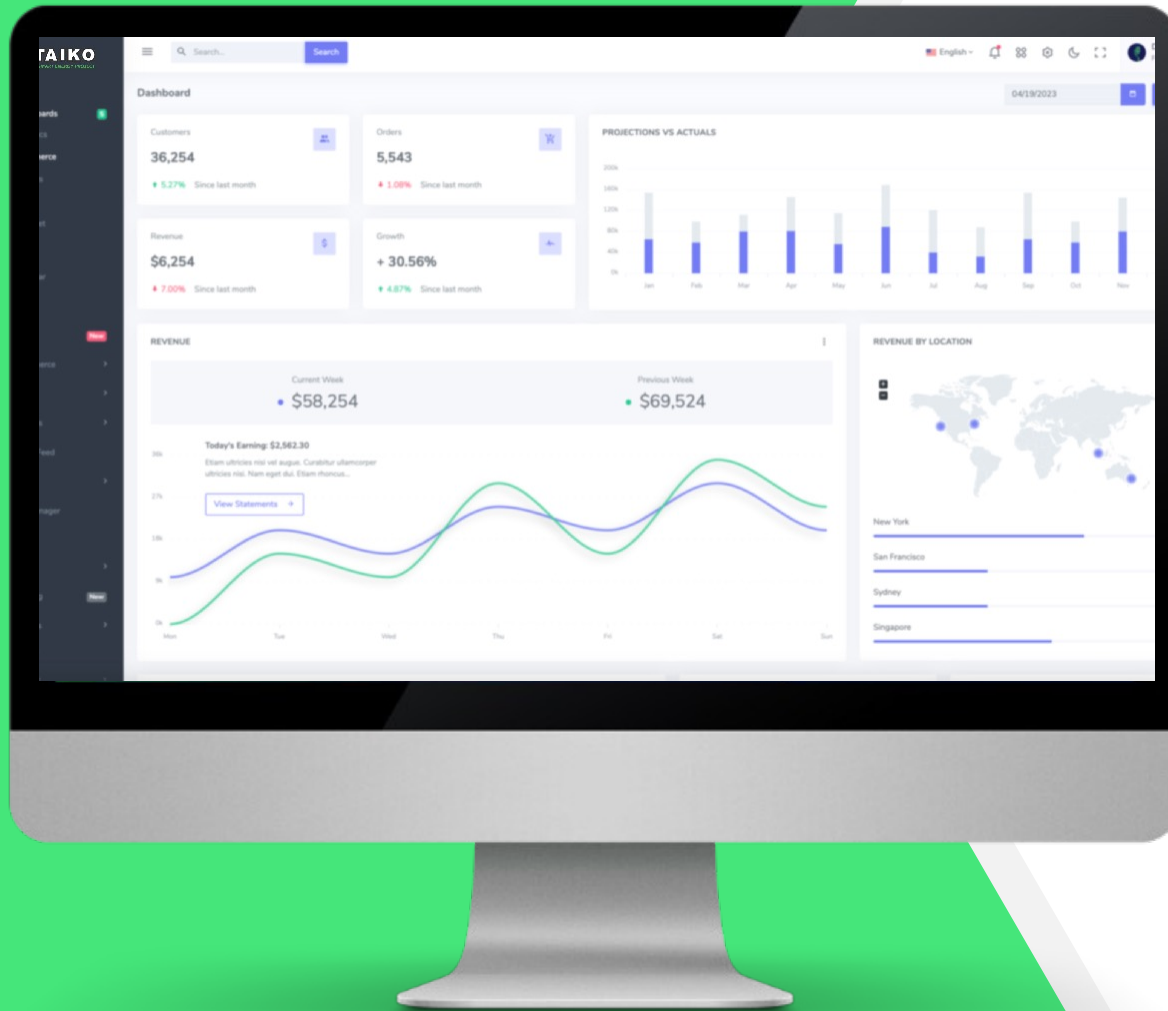

Trade Agreements 30%

Post Rental 40%

DASHBOARD

The Voltaiko Platform

Advanced software for the management of your remote systems. Rent, analyze, choose, organize, build your network of clients and stay up to date with the latest news
